DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 10, "holding means" lack antecedent basis.

In claim 11, line 2, "two housings" should be – the two housings --.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kagaku et al.

(JP 11-587). Kagaku et al. disclose, in figs. 1, 3 and 10, a fluid dispenser comprising:

two distinct dispenser units, each comprising a fluid reservoir (C) defining an opening 60, a dispenser member 43 for taking and dispensing the fluid from the reservoir, and a fastener member (73) for fastening the dispenser member (43) on the opening (60) of the reservoir (C); and a common outer shell (11) in which at least the two reservoirs are housed, the shell including receiver means 10) for receiving and

holding the two dispenser units inside the shell, said dispenser being characterized in that the receiver means form two snap-fastener housings, the holding means forming a peripheral radial flange (74) which extends outwards, and which is for snap-fastening in a respective housing; a blocking means 5a for blocking the dispensing units in receiving means; and a dispensing head 22.
